2 ABOUT THE EVENT / POSITIONING STATEMENT

This is not merely a trade show. Recover & Rebuild Jamaica Expo 2026 is a national recovery platform purpose-built in direct response to the damage caused by Hurricane Melissa. It is the single most concentrated environment in Jamaica where the products, services, professionals, government agencies, and financing options needed to rebuild are accessible in one place, over two days.

Every exhibitor, sponsor, and participant at this platform is here because they have a direct, demonstrable contribution to Jamaica’s recovery. That focus is what makes it valuable and what makes the audience here unlike any other event in the region.

“ How does this help Jamaicans rebuild faster, smarter, stronger? ”

Every product, service, and conversation here is oriented toward one outcome: helping Jamaica rebuild. Companies that share that orientation will find no more relevant or rewarding platform.
